

# WritePass Trial Essay

## **TRIAL ESSAY**

Write a 1,000 word essay on ANY of the following topic:

- In the next five years, what developments in engineering are most likely to transform medicine, and how?
- Pick any area of Engineering (civil, mechanical etc) and critically analyze how that aspect of engineering would change the way we live over the next decade.

The manner in which you structure your analysis is totally dependent on you, and it should not exceed 1,000 words (excluding abstract, references, bibliography, appendix, and table of contents).

As a guide,

- Your work must be fully referenced in the Harvard referencing style
- Your work must include an abstract, introduction, body and conclusion.
- You must refer to recently published academic and medical journals, newspaper articles, economic data, and books when conducting your research
- Your analysis should be written up to at least a 65% standard.

The trial essay would be assessing the following,

- Your research skills
- Your written English skills
- Your ability to conduct analysis on non readily available data, and write concise but high quality reports and analysis
- Your knowledge of politics related subjects
- Your ability to write structured and accurate reports and analysis, especially when detailed assessment guidelines are not provided.

Good Luck.
